Subject: Ashley Oaks Water System (#2007-41-W)
Date: Tue, 15 May 2007 12:20 AM

Mr. Terreni,

My wife just received a notice from Mike Shelly this evening (05-14-07) about another delay to transfer Ashley Oaks Water system to City of Columbia. I dont know what the issue is about that made Ms.Young file a motion to delay the water system ,but we should not be held at bay any longer.I have resided here for five years not knowing about the troubled water system that has been going on for nearly ten years. I cant evening get adquate water pressure to water my backyard .(also the front yard most of the time) My back yard has been dirt and wild grass ,its been an eye sore for a long time until last year.Also,we get alot of air in the water line.Takes approximately 20 minutes to fill the washing machine,not including spin cycle! Dont forget the commodes.

Upstairs bathroom the water trickles out of the shower head and at times the main floor shower,too.When we have company from staying a few days the water presurre problem is amplified. **Richland county should have never approved additional homes to be built in phases 1,2&3 , due to years of inadequate water supply and system design! That is another story.**I know the continuing drought had been a factor in this problem .We need the new water system in now to prevent us from having to eventually get a motel just to shower,like the lack of water incident about a month ago. The water issue will affect (has already for some owners) the **selling value of our homes if not resolved. Is it fair to delay water supply to some 80 plus famillies** for a issue that cannot be resolved for Ms. Bobbi Young.If not,can you condemn that part of the right of way on her property? I know that procedure is last resort,but under the circumstances can you?

Best Regards,

Steve Abrahamsen
